SUBSCRIPTION \$2.00 PER YEAR

BAY ST. LOUIS, MISS., FRIDAY, OCTOBER 19, 1951

VOL. 60 — NO. 44

Observations... by the Editor

The monument to the memory of Foster Commager has been erected on the courthouse lawn. The dedication ceremony will be held at a later date, following the beautification of the grounds. A great tribute to an outstanding man... one who should be an inspiration to every youth of our community to lead a good, clean, wholesome Christian life.

The Hancock County Chamber of Commerce is trying to get their new year off to a good start, and they are planning a live year, starting off with a bang up crowd at their shrimp boil next Thursday night, October 25. Ted Robin is in charge of this affair and he tells us that he has the promise of Ed. Khayat of Moss Point to be on hand as the principal speaker for the occasion. Ed. Khayat is a doer and his record speaks for itself. A member of the Board of Supervisors of Jackson County, and past president of the Mississippi Coast Council, he is interested in every and any activity which tends to build the Mississippi Coast. Perhaps some of his words may fall upon fertile grounds hereabout. Anyway, invitations are going out to every one who is, or has been, a member of the Chamber of Commerce to be present on that night. Set the date aside and make no other engagement. Give that one night for community good, and then make the resolution that you are going to continue working hand and hand with your fellowmen for the good of your city and county. The Chamber of Commerce should be the voice of the business and civic leaders of Hancock. It will be if you will make it so.

It is with regret that we have heard the announcement that Rev. Robert L. Lee, pastor of the First Baptist Church, is to leave Bay St. Louis. But we want to join with his many friends here in extending him congratulations upon being called to the First Baptist Church of DeRidder, Louisiana, a much larger pastorate. Dr. Lee has endeared himself to his congregation, and to many of those not of his denomination, during his stay in Bay St. Louis. We say to the people in his new charge that we do not think they could have made a better selection.

A sand beach from McDonald's Lane to Carroll Avenue would be a sight to behold. It would certainly mean much to the City of Bay St. Louis; and to add to it, if the highway Department would allow us to retain some 1500 feet of the old bridge as a pier when the new bridge is completed, it would all add up to being the answer to many of our prayers. The question of whether we get a sand beach for free now rests, as we understand it, upon the shoulders of just a few folks. We understand the Meritt, Chapman and Scott folks have been contacted and their answer was quite favorable; the City Fathers, members of the Park Commission and the Chamber of Commerce have been active, and are presently trying to secure easements in order to have a great portion of the sand placed on our beach front. Here's hoping we will be able to tell you next week that they have been successful.

Mrs. Maynard's Mother Expires

Mrs. Walter Maynard returned last week from Vicksburg, Mississippi, where she spent several days at the bedside of her mother, Mrs. Annie deRossett, who died, October 3, at the age of 90.

The deceased is survived by two daughters Mrs. Maynard of Bay St. Louis, and Mrs. J. J. Ring of Vicksburg; and 12 great-grandchildren, among whom are Jane and Mabel Taconi of Bay St. Louis.

At a meeting held Thursday, October 11, at the home of Mrs. E. M. Brignac, the Bay-Waveland Garden club discussed sponsoring a historical roadside marker for Bay St. Louis. The members were informed that the State Legislature appropriated the sum of \$9,000 for the erection of roadside markers at historical spots throughout the State.

Facts on historical data of Bay St. Louis have already been forwarded to Dean McLeone of Mississippi Southern college. It was voted, at this meeting, that the Garden Club would sponsor this activity; and, if Bay St. Louis is awarded such a plaque, a proper site will be designated and dedication ceremonies will be held. Mrs. Oliver L. Radford, president, stated.

Mrs. Roy Baxter was awarded a blue ribbon for an arrangement of wild flowers in a container made by the entrant of pine burrs. Mrs. B. F. Farrelly won the blue ribbon for horticulture with a pepper plant.

The program, given by Mrs. H. F. Danielson of Pass Christian, was on Hibiscus and their culture. Mrs. Danielson displayed specimens of Hibiscus blooms grown in her yard.

Refreshments were served following the program by the hostess and co-hostesses, Mrs. Brignac, Mrs. Baxter, Mrs. Paul Gaudet, Mrs. S. P. Murphy, Mrs. L. A. Rogers, Mrs. T. E. Schafer, Mrs. G. F. Stevenson and Miss Elsie Spurl.

Mrs. Radford presided at the punch table which was covered with a lace cloth and centered with an arrangement of yellow chrysanthemums and carnations. Approximately 41 members were present.

The Logtown School Parent-Teachers Association held a regular meeting at the school Tuesday evening, October 16, with approximately 40 adults, members, and guests present. In addition, a fine turn-out of 30 to 40 youngsters were present to view movie shorts while the meeting was in progress.

To instill interest in the P-T-A, the price of admission for the children at the movies was the delivery of at least one parent for the meeting. Quite a novel scheme which produced excellent results.

The evening's program included a 20 minute educational film on health and sanitation, talks by Dr. Shipp, Hancock County Health Department, official, and Wayne Allison, County Health Department Inspector, both of Bay St. Louis, and the business session for the meeting.

Dr. Shipp gave a comprehensive and enlightening report on many of his department functions and activities, to include the advantages available to the school children in particular, the control and prevention of disease, a report on the current dental hygiene fluorine treatment, the vaccination program and the part being played in correction of defects of physically defective children.

Wayne Allison, who is also president of Bay St. Louis PTA gave a short and entertaining talk on the functions of his department and some of the problems involved—Sanitation standards of the lunchrooms, and the need for continued and constant inspections to insure protecting children against disease. The business meeting included reports by committee chairmen and a discussion by Colonel J. E. Metzler concerning the purchase of a movie projector for use at the school. Following presentation of the plan for purchase and brief discussion on the advantages of owning such a machine, it was unanimously voted that the projector be purchased. Hancock County Is To Participate In National Blood Program Nov. 21

Approval of Hancock County for participation in the National Blood Program of the American Red Cross was announced today by Lamar Otis, chairman of the Hancock County Chapter.

At the same time, Mr. Otis announced the appointment of Mrs. Lucien M. Gex as chairman of the chapter's blood program committee. Volunteers serving with Mrs. Gex on the blood program committee are Dr. M. J. Wolfe, Medical Advisory Officer; Mrs. Leo W. Seal, Chairman of Service Groups; Mrs. E. P. Kirkpatrick, Recruitment Chairman; and Mrs. L. S. Elliott, Public Information Chairman.

Plans for completing organization and procuring and scheduling blood donors are expected to be finished by Wednesday, November 21; this community will then be visited by a Red Cross bloodmobile operating out of the regional blood center at Mobile. Volunteers will have an opportunity to donate their blood, which, after being properly processed through the regional center, will be distributed to the local hospital and physicians, for use in the community. Because it is supplied through the Red Cross, there will be no charge for the blood or its derivatives. However, there may be a charge made by the hospital and attending physicians for laboratory and administering services.

Chairman Otis further emphasized the community aspects of this vital program by saying: "The volunteer donor does not give blood to the Red Cross; Red Cross is simply an organizational unit in the community composed of our own friends and neighbors. It is through this unit that donors give their blood to life-saving agencies."

Hancock County's entrance into the National Blood Program came after thorough investigation and approval by local medical, hospital and health authorities, who found the Red Cross-sponsored program well-suited for supplying the blood needs of the community. Because the project is a community program, local physicians will be in control of it at all times. For this purpose, the local chapter chairman has named Dr. Wolfe chairman of the medical advisory committee to advise the chapter blood committee on professional and technical aspects of the program.

"This is a program of, by and for our people," Mrs. Gex said in accepting the chairmanship of the blood program committee. "We of the Hancock County Red Cross Chapter know that whatever the demands may be for making a success of this humanitarian project, our citizens will meet them. Because blood obtained through donations here will be returned to this community for use in our own hospital, this program is both a community opportunity and responsibility."

Buy Cook Books At Reduced Price

The Womens Auxiliary of the Bay-Waveland Yacht Club has voted to reduce the price of its cook book, "Straight from the Galley" from \$3.00 to \$2.00 a copy.

This offer is only good for the months of October and November, and it is made with the hope that everyone will take advantage of this reasonable price to buy a quantity of cook books and use them for Christmas presents.

This will not only give the recipient a gift that will be useful for many years to come; but, if they are sent to out-of-town friends and relatives, they will advertise Bay St. Louis far and wide, and make people even more anxious to visit and settle on the Gulf Coast.

Service groups of Hancock County Chapter of the American Red Cross and other local organizations met at the home of Mrs. Leo Seal Tuesday morning to discuss plans for entertainments to be given for the Veterans of the Gulfport V. A. hospital during 1951-52.

The following organizations will participate: November, Altar Society of Our Lady of the Gulf Catholic Church and St. Margaret's Daughters; December, Bay-Waveland Garden Club; January, 1952, Bay High P. Plans for the house-to-house canvass for blood donors were discussed. All workers who participated in the Red Cross Finance drive will be asked to serve again. Blood from future blood banks will be available to the community as well as to the armed forces. Your gift will work for the health and life of someone else. The person receiving the blood will not be charged for it; the only charge will be the fee of the physician or hospital administering the blood.

J. V. Fly, special representative of the New Orleans blood center, will be in Bay St. Louis November 16, to conduct an orientation course. Jack Lott was named Supervisor of Bay 4, Hancock County by a majority of 11 votes over Lander H. Necaise, in the election held Tuesday, October 16.

At the election held August 28, Lott received a majority of 31 votes over Necaise from the result as canvassed by the Democratic Executive Committee; however, a contest was filed by Necaise, and the special tribunal, presided over by Judge Neville Patterson, directed that another election be held at the Caesar precinct.

Having been agreed by the candidates and their attorneys that the managers of election had failed to comply with the law, in that one of the managers signed the names of all the persons voting in the election on the register instead of allowing the individuals to sign their own names, a new election was called.

In the original election in the Caesar Precinct, Lott received 133 votes and Necaise 70, and in the election of last Tuesday Lott received 128 votes and Necaise 83. These totals added to the votes in the other precincts of the beat acquired in the election of August 28, gave Lott a total of 448 and Necaise 437.

The managers agreed upon, and appointed by the court, conducting the election of last Tuesday at the Caesar Precinct were Fitzhugh Lee, John Rester and Virgil Stockstill.

ALERTNESS IS PROGRESSION

Results are always obtainable where cooperation exists, and the efforts which are being put forth by our City fathers, members of the Park Commission and the Hancock County Chamber of Commerce to have the firm of Merritt, Chapman and Scott pump the sand they must dredge from our beach from McDonald's Lane to Carroll Avenue, exemplifies a spirit of cooperation which is needed for the benefit of the City of Bay St. Louis and for Hancock County.

In order for the City of Bay St. Louis and Hancock County to join the March of Progress of the Mississippi Gulf Coast, it is absolutely necessary that there be cooperation between the Officials of our City and County, and our business and civic leaders.

Cooperation does not mean the mere question of not offering opposition to a proposition. In order to accomplish worthwhile objects, it is going to be necessary that all work, and work hard, with a common purpose in mind.

The old method, which has embedded itself into our beings in this beautiful little city, of letting the other fellow do it, and of considering everything attended to, must be cast aside if we expect to move forward. A nonchalant and complacent attitude must be a thing of the past. We must be alert and aggressive and always on hand, ready to do our part.

If we differ in opinion on matters they should not become personal, nor should it cause us to draw up in a shell and refuse to do our part. We should realize that we cannot always be right. Team work is the winning combination; and, apparently, teamwork, as is now going on, may be the answer to our needs.

Of course, we are going to have some who will attempt to throw cold water on every proposition offered for the betterment of our City and County; but a bit of opposition off times is an incentive.

The will to do must come first, and if we will all resolve to make ourselves into a committee of one not to overlook any one object which may be of community benefit, and then join the committee of the whole in bringing it to a successful conclusion, we will be rendering a real service to our city and county.

TESTING PROGRAM
The Bay High School faculty met Thursday night with Dr. James F. McKee of the department of Psychology and Guidance of Mississippi Southern College to make plans for a complete testing program for all students in the public high schools of Bay St. Louis. This testing program will consist of intelligence, reading readiness; and, later, during the session a test of achievement. This testing program is being carried out with the financial aid of our local P-T-A.

CUMULATIVE RECORDS
The results of these tests will become an important part of the cumulative record that is being initiated concerning each individual student in school. A separate file is set up for each student. This file will include the student's scholastic record, health record, results of tests and any other important information concerning the student that will lead to better student progress in school. This cumulative record, which will follow the student through school from the time of entrance to graduation, should be of great assistance to teachers in their counseling with students.

Every sophomore, junior, and senior English student has paid for a nine months' subscription to the Digest and learns on an average of 50 to 75 new words a month. This study has proved an invaluable aid to graduates who have taken tests to enter various branches of the armed services. While the word study is underway, students are permitted to read and enjoy their copies of the Digest which provide the best in current reading.

The school has also purchased a new set of encyclopedias, equipped with a rolling stand which can be conveniently wheeled from class to class.

LETTERS

Let's Get on the March

To the Editor:

Why should we, the people of Hancock County, stand by and let the wide-awake businessmen of Picayune out-manuever us.

In my personal opinion, I can agree with the merchants of Picayune; but it is heartbreaking for me, a citizen of Hancock County, to sit idly by and see our County go backward instead of progressing.

I implore the citizens of Hancock County to write to the members of our Board of Supervisors and our Representatives and ask that blacktop roads be built from Aaron Academy, Flatport, Leetown and Necaise Crossing into Bay St. Louis and to encourage the Hancock County Chamber of Commerce to wake up and plan County Fairs, etc., to attract visitors to this area. This could increase the growth of Hancock County.

If the road, which Picayune is trying to secure, goes directly from Picayune to Gulfport, by-passing Bay St. Louis what then?

Think this over good people of Hancock County. Let's go to work and cooperate with each other and improve our county so that our children will be proud of us and our area.

Respectfully,

T. J. (JEFF) WHITEFIELD

Pecan Marketers
Hold Meeting

The pecan marketing agreement
for this season was explained to
approximately 40 coast producers
and handlers at a meeting last
Tuesday morning, October 2, in
the Gulfport Recreation Center
by members of the Extension De-
partment, Mississippi State Col-
lege and the head of the Federal
State Inspection Service.

Discussions were led by W. E.
Jones, Extension Marketing Spe-
cialist, Fruits and Vegetables, of
Jackson, assisted by Leon Scott,
Federal-State Inspection Service,
Jackson, and Chesley Hines, Ex-
tension Horticulturist, State Col-
lege.

The agreement, which covers
Mississippi, Alabama, Georgia,
South Carolina and Florida, and
is going into effect for its third
season, requires that pecans sold
to an in-shell market, meet a
quality minimum of at least 75
percent of a U. S. No. 1 grade nut
for shipment, outside, the five-
state area. An inspection charge
is paid by the handler or shipper.

Scott said he would send in-
spection personnel to the County
agent's office in Gulfport in mid-
October to take care of inspections
and that additional personnel
would be sent in November.

According to Jones, this year a
new exemption to the agreement
provides that a person may sell a
maximum of 200 pounds of nuts to
any one person on any one day
without meeting the inspection re-
quirements.

Average price paid for unshell-
ed that the average would be
periodically, Jones stated. He ad-
ded that the average would be
daily by handlers to the Produc-
tion and Marketing Administra-
tion, Atlanta, as to the prices paid
producers and received from han-
dlers. The handlers whose report
will be kept confidential, will also
send to the Atlanta PMA office a
daily report of shipments of the
unshelled nuts shipped outside
the five-state area.

unpaid, and,

Whereas the said Clyde Coburn
and Lorraine A. Coburn the hol-
ders of said indebtedness having
requested me, the undersigned
Substituted Trustee, to foreclose
said Deed of Trust,

Now therefore, I will on Mon-
day, October 29, 1951, between
legal hours offer for sale and sell
to the highest bidder for cash in
front of the front door of the
County Court House of Hancock
County, Mississippi, at Bay St.

S. S. MORAN
Substituted Trustee.

10/5/51.

Producers are more interested
now in improving pecan quality
since the prices have become bet-
ter, Hines continued. He said
prices were up seven per cent
from last year.

This is the best crop in 15 years
for Mississippi, he continued, but
there has been a short crop in Tex-
as and Oklahoma which will prob-
ably cut down the tonnage pro-
duced.

He estimated that Mississippi
will produce 9,300,000 pounds of
pecans this year.

The horticulturist recommended
that trees be trimmed out in
overcrowded orchards; he cited
examples where the plan had
worked to the advantage of the
producer.

He also advised that Stewart
or Lewis pecans be used in graft-
ing trees and said that the suc-
cess variety was especially sus-
ceptible to scab.

Urging that applications of ni-
trogen and zinc sulphate be ap-
plied, Hines said this would keep
the trees in vigorous condition.
The need for fertilization is es-
pecially true this year, he added,
because of the extra heavy crop
of nuts.

Addition of the zinc sulphate
to fertilizer used to aid starved
trees will also cut down Rosette
which causes the trees to die back
and a spindly sucker growth to
begin between the trunk of the
tree and the dead area, he said.

Leaves and shucks should be
destroyed to reduce leaf disease
and aid in the control of scale, he
advised.

When winter cover crops are
planted, Hines stated, phosphate
may be added to the soil in the
pecan orchard; he recommended
Austrian peas, winter peas and
blue lupine for the Coast area's
winter cover crops.

Freshly gathered pecans should
be kept dry and in a ventilated
place in shallow trays or sacked
and stacked in a way to avoid
cutting off circulation of air to
cut the chances of mold, Hines
concluded.

According to Clarence Kerna,
Route 1, Gulfport, blue jays are
the newest menace to the pecan
crop; others present complained
of crows damaging their crops.
This damage amounts to approx-
imately one-third of the pecan
crop, they said.

Ohio Rester of Hancock County
attended the Gulfport meeting.

Louisiana - Mississippi Game Service
Make Agreement On Licenses

Mississippi waterfowl hunters
will receive the benefit of a reci-
procal agreement just concluded
between the Game and Fish
Commission of Mississippi and the
Louisiana Department of Conser-
vation, according to an announce-
ment made this morning by Di-
rector R. M. Freeman, director of
the Mississippi Commission.

Under the terms of this agree-
ment, licenses purchased by hun-
ters in either state will be recog-
nized as valid, in certain areas,
during the time the seasons of the
two states run concurrently. The
area in which the licenses will
operate reciprocally is defined as
follows:

"In the Mississippi River or in
bodies of water between the Mis-
sissippi River and the levees near-
est the river where there is a
levee, and in lakes formed by the
old run of the Mississippi River
where the state line runs through
the said lake. The main lakes
being Eagle Lake, Palmyra, Yu-
catan and Rodney Bend where
there is no levee."

Under the terms of the agree-
ment, it is specified that when the
Louisiana season is open and the
Mississippi season is closed, the
resident licenses of both states
will be recognized in that part of
Mississippi lying west of the cen-
ter of the main channel of the
Mississippi River. Also the resi-
dent licenses of both parties will
be recognized during the time the
Louisiana season is closed and the
Mississippi season is open in that
part of Louisiana lying east of
the center line of the main chan-
nel of the river. The agreement
will apply where Louisiana and
Mississippi both border along the
Mississippi River and shall also
apply where Pearl River is a line
between the two states.

Director Freeman pointed out
that the reciprocal agreement

Keel - Jackson Wedding Held In Pass

Miss Nan Truman Jackson,
daughter of Mr. and Mrs. Mires
Rosenthal Jackson of Pass Chris-
tian, were married Thursday, Sep-
tember 27, to Lt. Murray Elbert
Keel, son of Mrs. Clarence Keel
and the late Mr. Keel of DeLisle.

Rev. J. P. McGlade performed
the ceremony at St. Paul's Catho-
lic church, where the altar was
banked with white gladioli, chry-
santhemums and fern. Bows of
white tulle and white blossoms
marked the family pews.

During the ceremony, Mrs. O. R.
Heistand, organist, played the tra-
ditional wedding marches and
music from Bach. Miss Betty
Joyce Keel, sister of the groom,
sang Panis Angelicus and Gau-
nod's Ave Maria.

Attired in a gown of ivory sa-
tin following princess lines and
featuring a net yoke edged with
heirloom lace, the bride was given
in marriage by her father.

She wore a finger tip veil of
illusion and carried a colonel bou-
quet of tube roses centered with a
pure white orchid.

Miss Sara Temples, Vidalia,
Georgia, served as maid of honor,
and Miss Judy Jones, cousin of
the groom, as junior bridesmaid.
Lt. Howard Merz, Washington,
D. C., acted as best man. Ushers
were J. Carroll Jackson, Alexan-
dria, Louisiana, uncle of bride,
and Edwin and Elvin Necaise,
cousins of the groom.

Following the ceremony, a re-
ception was held at Hotel Mira-
mar where the couple was as-
sisted in receiving by their moth-
ers and members of the bridal
party.

Covered with an imported
cloth, the bride's table was cen-
tered with a three-tiered wedding
cake set in a center piece of
Flour d'Amour, tube roses and
fern. Branched candelabra flank-
ed the arrangement. Tea girls
were Mrs. William Hodgins and
Mrs. Howard Merz; Miss Patsy
Hayden presided at the register.

Mr. and Mrs. Keel left for a
wedding trip to Birmingham. For
traveling Mrs. Keel was wear-
ing a red gabardine suit with

black accessories and the orchid

orders.

Where do you want it?

Now take it easy! That derrick and rig may weigh as much as a million pounds. Let's see... No, you just can't plunk it down in the back yard, either. Besides that, if someone delivered an oil well to your front door there would be a matter of spot cash payment to consider. That well carries a C. O. D. tag of, say, \$50,000!

That's generally considered a minimum. Cost of drilling an oil well in Mississippi ranges from \$50,000 to \$200,000 or more. Some producing wells never pay out the cost of drilling. Others are dry holes, and never pay a penny. Gulf has drilled 126 dry holes in Mississippi, and the cost of these non-producers represents a large part of the \$17,500,000 deficit which Gulf carries on its books for its Mississippi operations.

That \$17,500,000 which Gulf has spent in Mississippi beyond its income from oil and gas production represents an expenditure which only a company of Gulf's experience and resources can handle. But more than that, it represents a risk that only a company which has confidence, faith, and a long-term interest in the prosperity of Mississippi would dare to take!

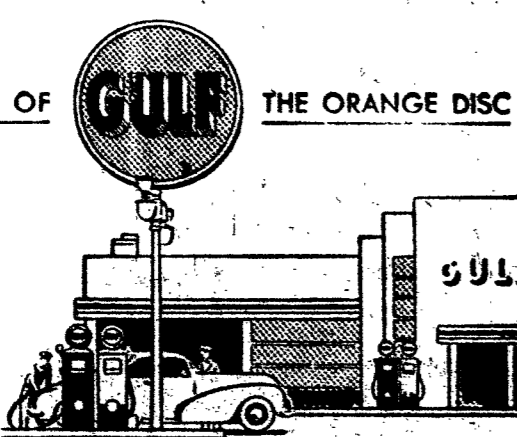

Gulf has that confidence and interest in Mississippi. It has spent over \$75,000,000 in payrolls, taxes, purchases, lease and royalty payments and other items necessary to the proper development of Mississippi's oil and gas resources. Today it is one of Mississippi's major industrial organizations and its family of over 7,000 persons joins other far-sighted Mississippians in building a better, more prosperous life for all.

FROZEN FRUITS AND VEGETABLES

Ceiling price regulations for the 1951 packs of frozen fruits and vegetables have been issued by the Office of Price Stabilization to establish equitable ceilings in the comparatively new food field.

Their effect, OPS said, will be slightly higher ceilings at the consumer level, although ceilings for some major frozen vegetables will reflect processing economies that have been made since 1948, the base year used in determining ceilings.

The regulations, CPR 81 for frozen vegetables, and CPR 82 for frozen fruits and berries, are similar in many respects to regulations for the canned fruits and vegetables industries. They become effective October 25, 1951, or on an earlier date a packer may select.

CEILING RATES FOR WAREHOUSES

The procedure under which warehouses licensed by the U. S. Department of Agriculture may establish their ceiling rates or obtain adjustment of their rates has been simplified by a Supplementary Regulation to CPR 34, effective October 15, 1951.

Until now such warehouses have been required to establish their rates or obtain adjustment of their rates under CPR 34, OPS regulation covering warehouses licensed under the U. S. Warehouse Act.

Under the new Supplementary Regulation, warehouses subject to control by the Department of Agriculture upon obtaining approval by that Department of their proposed rates under the C. S. Warehouse Act must file with OPS a copy of the order of approval, together with a copy of the rates and charges. If those rates are not disapproved by OPS, they will become the ceiling rates for such warehouses.

OTHER RECENT AMENDMENTS

OPS announces the following amendments to ceiling price regulations:

Individuals manufacturing items in their homes and whose sales amount to one thousand dollars or less each calendar month are no longer subject to price control. The items concerned, however, must be made for the individual's own account without the aid of hired employees. This action was taken in Amendment 19 to the General Ceiling Price Regulation and becomes effective October 13, 1951.

A further extension of automatic in-line pricing at retail for several groups of consumer goods including pianos, radios, housewares, electrical appliances, luggage and sporting goods is covered by Amendment 10 to Ceiling Price Regulation 7. This amendment applies to retailers handling new categories of specified articles not included on their pricing charts. In-line pricing permits these retailers to apply mark-ups derived from comparable categories already listed on their pricing charts.

An amendment to Ceiling Price Regulation 30 gives machinery manufacturers who have not already filed their computations an alternative method of computing materials cost adjustments. This new amendment is effective October 13, 1951.

The list of vegetables covered by Ceiling Price Regulation 55 has been expanded to include practically all canned vegetables and their products. The amendment to CPR 55 is effective October 20, 1951.

In an amendment to Ceiling Price Regulation 22 applying to converters, finishers, dyers and throwsters, OPS has added yarns and fabrics made from natural or synthetic fiber or filament to the list of manufacturing materials for which the charge in net cost may be calculated up to March 15, 1951.

Operators of business establishments in Mississippi needing information relative to OPS ceiling price regulations should contact the Mississippi District

Student S S Exams To Be Repeated

Two new dates have been announced for the Selective Service College Qualification Test to be given at 19 examination centers throughout the state, it was disclosed today by Colonel J. W. Patton Jr., Mississippi Selective Service Director.

The tests will be given December 13, 1951, and April 24, 1952. Both days are Thursdays. Scores made by examinations will provide their local boards with evidence of their aptitude for continued college work and may be used by the boards for guidance in considering the students for deferment.

Colonel Patton said that application blanks and an information bulletin describing the test are available now at all local boards. Applications for the December 13 test must be postmarked not later than midnight November 5, and for the April 24 test not later than midnight March 10.

The applications must be mailed in special envelopes which the local board will provide. A student can get the necessary forms at any board. Bulletin of Information may be obtained at all colleges.

The criteria for deferment as a student is either a satisfactory score (70) on the Selective Service College Qualification Test or satisfactory rank in class (upper half of the freshman class, upper two thirds of the sophomore class, upper three fourths of the junior class.)

children, Jane, Judy and Charles, of Lumberton were weekend guests of Mr. and Mrs. Charles Mitchell.

Mr. and Mrs. Lumo Ladner were business visitors in Bay St. Louis Thursday.

Mr. and Mrs. Ray Fare and son Larry, of Nicholson visited in the C. R. Penton home Monday.

Mrs. Clinton Martin, Mrs. C. R. Penton and Johnnie, Sharon and Dutch Wilbanks visited Mr. and Mrs. C. P. Williams of Catahoula community Tuesday.

Mrs. W. J. Fleming, Jr., and Mrs. Bill Wilbanks visited in the Lenn Dosssett home of Gainesville Tuesday.

Brother B. Smith of the Baptist Bible Institute in New Orleans served as pastor at Harmony church last weekend. With his wife he spent Saturday in the home of Mr. and Mrs. Wilton Wheat, and spent the night with Mr. and Mrs. Tillie Davis.

To be eligible to apply for the test, Colonel Patton said, a student must (1) intend to request deferment as a student; (2) be actually attending college and satisfactorily pursuing a full-time course leading to a degree; and (3) must not previously have taken a Selective Service College Qualification Test. High school students are not eligible for the test, he emphasized, nor are high school graduates until they have actually entered college.

Colonel Patton advised students whose academic year will end in January 1952 to apply for December 13 test so they will have a score in their file when the local board reconsiders their case in January to determine whether they meet the criteria for further deferment as students. He also advised students completing a full college year to have their local board furnished with the college with a report of their scholastic standing, so that the board may have both the test score and the class standing on which to base its action.

Colonel Patton explained that the intent of Congress was that these students should be deferred only until they completed their college training. The word "deferment" means just that—Colonel Patton said. It means that a registrant shall have his service delayed or postponed until he completes his education. It is by no means an outright exemption.

He called attention to the fact that a student or anyone else who is deferred remains liable for military service until he reaches the age of 35. Qualified students are deferred, he said, in the belief they will prove more valuable to the country after completing their education than they would be without it.

WEEKLY NEWS LETTER

W. F. BOND, Commissioner State Department Public Welfare

During the last twelve months, over one hundred girls in Mississippi suddenly found themselves in serious trouble and in need of a friend. In a situation of this kind, some fall victims to quack or unreliable doctors, some feel that they have reached the end of the road and take their own lives, and some go to questionable institutions where their babies are sometimes, so it is said, sold at a profit.

All of this is unnecessary. Such girls should get in touch with the county welfare office of the county in which they live or with the state welfare office in Jackson, either by visit or letter which will be held in confidence. There is a safe, sane, humane and best way out for there are reliable institutions ready to give every needed service.

County Agent's Notes

November 1 Is Deadline For Seedlings

By JAMES TOLER

DEADLINE. November 1 is the deadline for filing applications for pine seedlings. Applications should be sent to the local county agent or the local area forest ranger.

Plan now where the seedlings are to be planted. Do not wait until cold weather. After cold weather arrives, it is too easy just to plant the seedlings in the middle of a pasture.

VALUABLE. Timber is more than just a "patch of woods on the lower side of the pasture"; it has economic and recreational value. Soil holding or erosion control is just one use of timber; other uses are for cash income from sale of timber and paper wood and as wildlife cover and scenic beauty. Manage timber properly for best results. Make your management program include reforestation, protection, proper cutting methods and good marketing.

DO NOW. Now is the time to make applications for seedlings, carry out stand improvement work and make arrangements for fire protection during the fall fire season.

PASTURES

Grazing out all row crops as soon as the crop has been harvested and help prevent overgrazing your pastures. Many times after corn and beans have been planted together, the corn is harvested and the beans left in the field. Cattle turned into such field would receive the benefit from corn that had fallen besides harvesting what grass and beans remain in the field.

OCTOBER DO'S AND DON'TS. Don't begin grazing winter pastures too early; don't let grass-worms eat your winter grazing and don't fail to use the cut-packer on all seedlings. Do apply any minerals and fertilizer needed on permanent pastures; plant ryegrass in pure clover sod; select areas to be cleared this fall or winter and do complete the pasture plan for your farm.

GARDENING

Plantings in the home garden include kale, spinach, mustard, lettuce, turnips, radish and onion seed or sets. Other jobs include side-dressing September planted vegetables; preparing next year's compost heap; digging sweet-potatoes before frost; harvesting and storing root crops as turnips, carrots, beets and rutabagas.

Legion Campaign For Members Is On

An intensive campaign to enroll every war veteran in this community in the American Legion for 1952 was announced today by Commander Fred E. Fayard, Sr., of the Clement Bontemps Post No. 139 of Bay St. Louis and Hancock County.

"Our objective is to establish a record membership for 1952," Commander Fayard said. "The American Legion today is the greatest bulwark of genuine Americanism in this country. Every eligible veteran should belong to The American Legion. It is his organization. It exists primarily to promote the interests of America and of the defenders of America. There is a job waiting for every war veteran in The American Legion - a job that has to do with making this community a better place in which to live as part of a nationwide program of keeping America stronger, more secure, more prosperous and always American!"

Commander Fayard said that Sidney Bourgeois and Bert Estapa, membership co-chairmen of the local American Legion post would be in charge of the 1952 enrollment drive.

"An intensive recruiting program will be carried on during this month," Commander Fayard said. "We will have several teams of membership workers calling on local war veterans. The

HOME AGENT'S NOTES

Make Corsages Of Old Nylon Hose

By MISS MADGE ALLRED

There's a fad going the rounds that will take some of the pain out of finding a run in your nylons. Just turn them into a corsage to perk up the lapel of your winter suit or the neckline of a dress or blouse.

NYLON CORSAGE

Materials needed to make nylon corsages are old nylon hose, color remover, various colors of dye, copper screen wire, old scissors, floral tape and a corsage pin. To make the Corsage—first remove the color from old hose with color remover. Some hose come out of the color remover in beautiful tones; others will need to be dyed to be attractive.

Cut an 8-inch square of copper screen. Remove and group the crosswise and lengthwise wires. Use crinkled wire for making petals and leaves and straight wire for wrapping petals and leaves.

Holding one end of crinkled wire in one hand, with other hand, make petal-shaped loop 1 to 2 inches in height. Wrap end of wire tightly at base of loop. Cut the nylon in 3 inch squares. Pull square tightly over the petal-shaped loop. Twist the plain wire around the base of the petal to hold the nylon in place. Trim off excess nylon below, then continue to twist the wire to make stem wire of desired length. Cut off excess. Five petals will be needed for each blossom you make.

Make the center for the blossom by rolling a tiny piece of nylon between thumb and forefinger. Pull a larger piece of nylon over the all and wrap it with wire at the base. Place the center at the base of one petal. Arrange the other petals around it. Wire all of the petals together. Wrap the base and stem of the flower with florist tape.

Make leaves exactly the way you make a single petal, except that the shape of the loop in the wire is more oblong and the color is green. Buds are similar to leaves, except the colors are the same as the flowers.

Arrange the blossoms, leaves and buds as desired. Wire together to hold in place. Cover with florist tape and twist end.

TENSION SCREENING There is a new type of ready-made screens available now called "tension screens." These are usually of aluminum. They are put up and made taut by securing them at the top and with wing-type fasteners at the bottom. They are not fastened at the sides and may easily be

stretched when their age group is reached in the respective boards throughout the state. Therefore it is most important for all married registrants to make sure that their board has full information concerning their status.

These screens are perhaps a little expensive, but probably not much more than having good screens made.

When buying electric equipment look for the UL label of the Underwriters' Laboratory on both electrical equipment and cords. This label shows that the article has been tested and passed as safe.

Discusses Dental Program At P.T.A.

The Bay High PTA met in the Youth Center with the president, Wayne Alliston, presiding, last week.

Mrs. John Husband, program chairman, introduced the guest speaker, Dr. Raye N. Byrd, of the U. S. Health Service and the director of the Dental Clinic now in progress at Bay High.

In explaining this work, Dr. Byrd gave a brief background on sodium fluoride, a chemical substance now being used to prevent tooth decay.

Some thirty years ago it was discovered in Colorado that there were an unusual number of people with brown, stained, pitted and mottled teeth, a condition caused by too much sodium fluoride. After a great deal of research, it was found, that a 2% sodium fluoride solution would eliminate 41% of tooth decay.

Many communities throughout the country have added this 1.5 per million solution to the water supply but, Dr. Byrd said, the treatment of the teeth of the school children would be less expensive and take care of more children in a county such as Hancock.

cock because everyone in the county does not use the city water supply.

The technique of the full treatment consists of cleaning the teeth, blocking with cotton roll, drying with air, and applying the sodium fluoride solution four times several days apart. The proper ages for children to receive treatments are three, seven, ten, and thirteen. At these ages they are having new permanent teeth to form.

Dr. Byrd stated that it would cost this county approximately \$700 or \$800 a year, going in with Pearl River and Harrison counties, to set up a full time dental

program with one person doing all the work for three counties.

The purpose of the present dental program is to show that a large number of children can be treated in a short period of time and to stimulate interest in such a program so the people in the community will want to establish one.

At the next PTA meeting Education Week will be celebrated.

To celebrate State PTA Birthday, Mrs. Bufkin Oliver gave a brief history of the growth of the PTA.

Mrs. N. Rouse, membership chairman, announced that there are 136 paid members of the Bay High PTA at present.
